

Kilns for Dolomite & Mgo

- ▲ Dolomite & MgO Tunnel Kilns of GKT
- ▲ Shortest firing cycle < 46 h c/c
- ▲ Capacity of each 40,000 tons/y
- ▲ State of the art and highly efficient
- ▲ Max. 1750 °C

German Kiln Technology installed 2 huge Tunnel Kilns for firing the sensitive dolomite refractory. The TK is designed to fire MgO at 1750°C and Dolomite at 1650°C and master both very disparate firing curves in an outstanding way. Due to the excellent firing results the customer prefers to fire large Dolomite bricks only, with lowest consumption.

If you would like to know more about our technology & sophisticated techniques, in addition to range of other kilns, please contact us, we would be more than pleased to discuss and describe how we can help you.
